#### 3 Safety Disposal boxes Rigi-Box twin

**NEW!**

For the disposal of scalpels, used cannulas, tubing, broken glass and long-stemmed objects (i.e. pipettes).

Sarstedt (Desaga)

- Universal stripping/detaching devices also for insulin pens
- The deposit slot can be enlarged by progressively breaking off the flaps and is therefore ideal for versatile use
- All boxes can be fixed with an adhesive adapter or a wall holder to prevent them from overturning (optional accessories)

#### 4 Safety Disposal System Kontamed

Dimensions: 225 x 160 x 70mm. A hygienic and safe container for the disposal of used medical materials such as syringes, cannulae and scalpels. Constructed in impact and heat resistant polypropylene and easily disposable materials. Physiologically clean. With wall mounting and safety closing flap in red. The Kontamed safety container is designed with three drop slots. One for the disposal of cannulae and syringes, enabling you to avoid contact with them. The second slot is used for the disposal of potentially infected scalpels and blades. The third allows for the disposal of dressings, gloves etc. Before disposing of the full container, the built-in security seal must be activated, thus ensuring that the contents are stored effectively.

Description	PK	Cat. No.
Sharps Disposal System Kontamed	1	<b>9.264 148</b>

#### 1 Needle Disposal System Kontamed Mini

115mm high x 50mm dia. Polypropylene construction. The Kontamed Mini is impact and temperature resistant as well as physiologically clean. It can be disposed of safely and is environmentally friendly. Perfect for doctors or paramedics on the move. Easily stored in a doctor's bags, emergency kits or in medical clothing. Kontamed Mini is equipped with a drop slot for cannulae and syringes. It also features a reinforced metal base, to stop syringes or other sharp objects from penetrating the container base.

430	570	dark green	46	1	9.000 941

#### Mercury collector

**NEW!**

Bürkles mercury collector enables the easy collection of spilt mercury, which can then be used again. The mercury collector is composed of a PE tub. Within the screw cap lid there is a special plastic foam insert. On pressing this foam gently on the spilt mercury, the foams pores are opened and the mercury globules are absorbed. When raised, the foams pores are sealed again, thus keeping hold of the mercury. The cap is then screwed on the tub, the globules are released again and fall through the perforated separation into the tub.
